Following the huge Success of FMAS & DMAS

AMASI is Launching

MMAS - HERNIA

Dear Esteemed Surgeons,

On behalf of the Association of Minimal Access Surgeons of India (AMASI) and the College of Minimal Access Surgery, we are delighted to greet everyone attending the inaugural MMAS (Hernia) certification course. This is a first of its kind and a wonderful opportunity to earn an advanced fellowship in minimal access hernia surgery.

Following FMAS which provides exposure to basics in minimal access surgery, MMAS offers the candidates a special chance to study advanced and sophisticated robotic and laparoscopic procedures for hernia surgery.

With the participation of surgeons from across the nation, we have effectively finished more than 100 skill training courses at our AMASI Smart center. Our goal is to support all aspiring surgeons by offering this advanced fellowship.

Over the course of two days, you will acquire knowledge on a variety of laparoscopic and robotic hernia methods, newer techniques, troubleshooting, and much more from notable national and international faculty.

We hope this experience is gratifying and enlightening, paving the way for your future success and progress in all your surgical endeavors.

Advanced Fellowship in Hernia Surgery

MMAS - HERNIA

Master in Minimal Access Surgery

COURSE HIGHLIGHTS

Live surgeries

Reputed National and International faculty

Panel discussions

Engaging debates

DAY
1
