Following the huge Success of FMAS & DMAS

AMASI is Launching

MMAS – Upper GI & Other Specialities

Dear Esteemed Surgeons,

On behalf of the Association of Minimal Access Surgeons of India (AMASI) and the College of Minimal Access Surgery, it is our pleasure to extend a warm welcome to all participants of the inaugural MMAS (Upper GI Surgery) certification course. This groundbreaking event presents a unique opportunity to obtain an advanced fellowship in minimal access upper gastrointestinal surgery.

Following the successful FMAS program, which lays the foundation in minimal access surgery, MMAS offers a specialized curriculum focusing on advanced techniques in robotic and laparoscopic procedures for upper gastrointestinal surgeries.

With the collective participation of surgeons from across the nation, we have conducted over 100 skill training courses at our esteemed AMASI Smart center. Our objective remains steadfast in supporting the aspirations of all surgeons by providing access to this advanced fellowship.

Over the course of two enriching days on May 31st and June 1st, participants will delve into various laparoscopic and robotic techniques pertinent to upper GI surgeries. Renowned national and international faculty will impart knowledge on innovative methodologies, troubleshooting, and advanced techniques.

We trust that this experience will be both fulfilling and enlightening, serving as a stepping stone towards your future success and advancement in the realm of surgical endeavors.

Warm regards,

With highest regards,

Dr.R Parthasarathi
Course Convenor

Forthcoming MMAS Program

- Colorectal
- Bariatric
- Hepato-Pancreato-Biliary

LIVE SURGERIES

- Laparoscopic Fundoplication
- Laparoscopic Heller's cardiomyotomy
- Laparoscopic Leiomyoma Esophagus excision
- Laparoscopic Vagotomy GJ
- Laparoscopic Gastrectomy
