Dear Esteemed Participants,,

A hearty and warm welcome to the Minimally Invasive Proctology Course!

We are absolutely delighted to have you join us for this exceptional and enlightening program, which is designed to unfold over three immersive days. Our focus during this course is the intricate and multifaceted field of proctology, and we're eager to guide you on a remarkable journey through its essential aspects. Over the course of these three days, you will gain invaluable insights into various proctological conditions, including Hemorrhoids, Fistula management, Pilonidal Sinus, and Anal Fissures.

Day 1: Hemorrhoids Our inaugural day will be dedicated to Hemorrhoids, an ailment that affects countless individuals worldwide. We will begin by unraveling the intricate anatomy of the anal region before proceeding to delve into the clinical examination, classification, and medical management of Hemorrhoids. The day's sessions will span a wide spectrum, from traditional approaches like rubber band ligation to cutting-edge techniques such as Laser Hemorrhoidoplasty and Minimally Invasive Procedure for Hemorrhoid (MIPH). Our live operative sessions will provide a firsthand look at procedures like Hemorrhoidectomy and Stapler Hemorrhoidopexy. We encourage you to actively participate in open discussions to foster an enriching learning experience.

Day 2: Fistula Day two will usher you into the world of Fistula management. Discussions will revolve around algorithms, treatment options like LIFT and Fistulotomy, and the role of lasers in addressing Fistulas. In the lab, you will gain practical experience, mastering the skills required to handle these challenging conditions. Live transmissions will showcase real-time procedures, ensuring you gain valuable insights into various aspects of Fistula management.

Day 3: Pilonidal Sinus & Anal Fissure On our final day, we will explore two critical areas within proctology: Pilonidal Sinus Disease and Anal Fissures. Understanding the etiology, clinical features, and management strategies for these conditions is paramount. The day will conclude with discussions on related topics, such as Perineal Tear repair, Rectovaginal Fistula management, effective constipation management, and proctology dressing techniques. We will also provide insights into setting up a proctology practice. As always, open discussions are encouraged to promote knowledge exchange.

By the end of this program, you will receive a certification recognizing your newfound expertise in minimally invasive proctology, a testament to your dedication and commitment to the field.

We are excited to have you embark on this educational voyage with us, and we hope you leave with not only knowledge but also a network of fellow professionals in proctology. Be prepared to immerse yourself in a wealth of knowledge, engage in practical learning experiences, and be inspired by the latest advancements in the field. Enjoy the course and the exciting journey ahead!

Let's embark on this educational voyage together and make it a remarkable experience!

With highest regards,

Dr. kushal mittal

LEARNING OUTCOMES

- **Comprehensive Understanding:** Gain an in-depth understanding of proctology, including the anatomy, clinical examination, and classification of common conditions like Hemorrhoids, Fistulas, Pilonidal Sinus, and Anal Fissures.
- **Decision-Making Proficiency:** Develop the ability to make informed decisions in the medical management of proctological conditions, including choosing appropriate treatment options based on patient needs.
- **Technical Competence:** Acquire hands-on experience and technical competence in performing minimally invasive procedures such as Laser Hemorrhoidoplasty, Hemorrhoidectomy, Fistulotomy, and more, through live transmissions and practical lab sessions.
- **Laser Proficiency:** Understand the role of laser technologies in proctology and gain proficiency in their application for conditions like Hemorrhoids, Fistulas, and Anal Fissures.
- **Advanced Procedures:** Familiarize yourself with advanced proctological procedures like EPSIT, VALAPS, Minimally Invasive Hybrid Procedures, and Perineal Tear repair.
- **Patient-Centered Care:** Learn to provide patient-centered care by effectively managing pain, constipation, and other associated symptoms, and by minimizing recurrences.
- **Clinical Decision Algorithms:** Develop and implement clinical decision algorithms for optimal patient outcomes in the management of Fistulas and other proctological conditions.
- **Proctology Practice Setup:** Gain insights into setting up and managing a proctology practice, including proctology dressing techniques and biofeedback setup.
- **Networking Opportunities:** Connect with peers, mentors, and experts in the field of proctology, fostering professional relationships and collaboration.
- **Certification:** Receive a certification upon course completion, validating your expertise in minimally invasive proctology.

WHO SHOULD TAKE UP THIS COURSE?

This course is tailored for medical professionals and healthcare practitioners interested in advancing their knowledge and skills in minimally invasive proctology. Specifically, it is ideal for:

- **Surgeons:** General surgeons, colorectal surgeons, and proctologists looking to enhance their proficiency in minimally invasive proctological procedures.
- **Gastroenterologists:** Gastroenterologists interested in expanding their scope of practice to include proctological conditions.
- **Residents and Fellows:** Medical residents and fellows in the fields of surgery, gastroenterology, and proctology looking to broaden their expertise.

COURSE HIGHLIGHTS

- **Exclusive Skill Course Center:** State-of-the-art facility tailored for Minimally Invasive Proctology training.
- **Experienced Faculty:** Distinguished experts in Minimally Invasive Proctology providing in-depth insights.
- **One-on-One Faculty Interaction:** Personalized guidance and insights from faculty in the field of Minimally Invasive Proctology.
- **Hands-On Training:** Practical learning with simulators and live demonstrations relevant to proctological procedures.
- **Ongoing Support:** Post-course mentorship and support for the application of proctology skills in clinical practice.
- **Comprehensive Curriculum:** In-depth coverage of proctological pathology, anatomy, and techniques.
- **Live Case Exposure:** Real surgical case observation for practical experience in proctological procedures.
- **Networking Opportunities:** Interaction with experts and fellow participants in the field of Minimally Invasive Proctology.
- **Continued Education:** Access to the latest advancements and practices in the field of proctology.
- **Certification:** Recognized certification upon course completion, validating expertise in Minimally Invasive Proctology.

Day 1: Hemorrhoids

Session 1: Morning

- Welcome and Introduction Anal Anatomy
- Proctology Clinical Examination Classification of Hemorrhoids

Session 2: Late Morning

- Decision Making in Hemorrhoids Medical
- Management of Hemorrhoids Office Procedures: Sciero & RBL

Session 3: Afternoon

- Laser Hemorrhoidoplasty
- Hemorrhoidectomy (Internal & External) Transanal Hemorrhoidopexy

Session 4: Evening

- Hemorrhoidectomy with Ligasure and Harmonic
- MIPH (Minimally Invasive Procedure for Hemorrhoid)
- Stapler Hemorrhoidopexy Lab Demonstration: Stapler, Hemorrhoidosuturopepy, LASER

Course Fees

- Practising Surgeons Rs 59,000/-

GEM Hospital, Chennai

Day 2: Fistula

- Session 1: Morning
- Recap and Introduction
- Algorithm of Fistula Management Discussion on Fistula
- Session 2: Late Morning LIFT (Ligation of Intersphincteric Fistula Tract)
- FIXcision
- Fistulotomy & Marsupialization
- Session 3: Afternoon
- Fistulectomy & Primary Sphincter Repair
- Overlapping Sphincter Repair
- Laser in Fistula: When and How? Minimally Invasive Hybrid Procedures for Fistula
- Session 4: Evening
- Lab: LASER in Fistula, Hemorrhoid, Fissure
- Live Transmission: LIFT, LASER Fistula, Fistulectomy, Intersphincteric Dissection

Day 3: Pilonidal Sinus & Anal Fissure

Session 1: Morning

- Welcome and Introduction Pilonidal Sinus
- Disease: Etiology & Clinical Features
- Approach and Procedures for Pilonidal Sinus

Session 2: Late Morning

- Managing Recurrences in Pilonidal Sinus
- EPSIT (Endoscopic Pilonidal Sinus Treatment)
- VALAPS (Video-Assisted Lateral Approach Pilonidal Sinus)

Session 3: Afternoon

- Anal Fissure: Etiology & Clinical Features
- Medical Management of Anal Fissure
- Surgical Management of Anal Fissure
- Session 4: Evening

- 4th Degree Perineal Tear
- Rectovaginal Fistula Repair
- Managing Constipation Effectively
- Proctology Dressing Techniques
- Pudendal Block and Proctology Setup
- Open Discussion
