Dear Esteemed Participants,

It is my privilege to extend a gracious welcome to all of you to the Basic Therapeutic Endoscopy Courses. With great anticipation, we embark on a two day journey dedicated to enhancing your proficiency in Basic Therapeutic Endoscopic procedures. The course is specially designed to cover the Pre procedure optimisation , consent , necessary accessories, correct techniques , pitfalls , tips and tricks.

Our erudite faculty, distinguished in their fields, will not only impart theoretical knowledge but also facilitate immersive practical experience. from engaging with simulators and animal models to witnessing live demonstrations. Each facet of the course is meticulously designed to elevate your skills and competence.

Understanding the value of personalized interactions, we have thoughtfully allocated time for one-on-one discussions during designated breaks. These interactions provide a unique platform for you to engage with our experts, share insights, and forge meaningful connections with fellow participants.

Thank you for entrusting us with your professional development. I am confident that the knowledge gained from this course will resonate in your medical practice for years to come. I eagerly await the unfolding of this educational journey and the successes it will inevitably foster.

With highest regards,

Dr. Sada Shivayya Soppimath  
Course Convenor

## Learning outcomes

- Learn to prepare patients effectively, obtain informed consent, and manage sedation / anaesthesia.
- Gain hands on experience through simulations and live demonstrations to enhance procedural skills.
- Develop strategies to overcome barriers and challenges encountered during procedures.
- Learn to select and utilize appropriate scopes and accessories for specific procedures.
- Gain proficiency in troubleshooting technical issues and managing procedural complications.
- Acquire specialized knowledge for performing therapeutic endoscopy in pediatric and high-risk patients.
- Foster collaboration and effective communication within interdisciplinary healthcare teams.
- Receive recognition for course completion, signifying a higher level of procedural competence.

## Who should take up this course?

Surgeons who are well versed with diagnostic GI endoscopy , must have undergone basic diagnostic endoscopy course from SMART Chennai , who wish to progress & enhance procedural skills by adding therapeutic endoscopy techniques, allowing for a more comprehensive approach to patient care

## Course Highlights

- Experienced faculty
- Minimal didactic lectures
- One to one discussion with faculty
- Hands on Simulators, tissue models and live demonstration
- Laying foundation for advanced therapeutic procedures including ERCP and EUS
- Trainee hand holding subsequently
